## NATIONAL BENCHMARKING TEST

### Class VI to X

**Respected Principal,**

TCYonline.com is the largest online platform for competitive & standardized exam preparation in India. From our experience of training over 7 lakh students, from more than 1500 towns across the country, enrolled for 40+ different categories of competitions, we have come to a few interesting conclusions.

- ◆ Concepts taught at school level form an important part of many competitive exams and serve as the foundation for others.
- ◆ Students at the school level are actually not aware of the importance of what they are studying.
- ◆ If school students are actually told about the skills they need to develop in each class and provided necessary inputs, they become motivated learners and are better prepared for competitive exams.

**TCY-NBT (National Benchmarking Test)** is an online test that has been designed, by Department of Educational Measurement & Research of Top Careers & You, to give a clear idea to students of class VI to X, what skills are expected from them and what they should do to enhance their competitive skills. Thousands of students from prominent schools across the nation have already appeared in this test.

**TCY-NBT** gives the student specific details about

- ◆ the skills he should develop today to help him succeed in top tests tomorrow.
- ◆ his standing today vis-à-vis his peers who would be his competitors tomorrow.
- ◆ how well positioned he is in various key subject areas

The 12-16 pages comprehensive test report provided to the student, also includes a detailed list of recommended actions that will help the student improve.

We would appreciate if you would motivate the students from your school to appear for this nationwide benchmarking exercise and benefit from the Comprehensive Student Report.

Thanking You  
Yours sincerely

Rajesh Wadhwa  
Director  
Department of Educational Measurement & Evaluation  
**Top Careers & You**
